To whom it may concern,

The Stobart Jet Centre has been working with GB Visuals for 16 Months and within this time, Gary and his team have supplied us with professional decal support for our equipment as well as numerous projects involving specific industry signage and CAA approved displays within our airport environment.

Prior to my time as MD of Stobart Jet Centre, I had been contracting Gary and his team to produce detailed products for another business, London XJet FBO, located at Stanstead Airport since 2013. Due to his high level of work and commitment in supporting us, this business relationship naturally continued and for the time I have worked with Gary and his team now being over 7 years, they have always delivered above and beyond my expectations on all required tasks.

The knowledge and experience provided by the GB Visuals teams for any project commissioned has always been welcome, as Gary will always consult fully and question requirements with detail prior to going into final production, knowing this is his expertise and where his trusted experience sits. Gary is honest when providing quotes which is welcomed, as he always suggests more cost-effective solutions that could assist the business requirements from different perspectives, this helps to maintain transparency and care that could potentially be of benefit to the organisation and maintaining strong relations for the future.

In addition to this, Gary Baker as an individual is passionate and whole heartedly committed to his business and maintaining a professional reputation, which for me, is a personality trait I admire and gives me confidence I'm working with a team who I can trust. He has always been supportive to any organisation I have been with, because of this I shall continue to work with GB Visuals for all our future requirements.

Examples of work conducted:

- Aviation equipment decal (large scale project including 6 pieces of aircraft equipment)
- CAA required VIP signage (including airport traffic, gate and internal)
- Merchandise (Large orders of pens, USB's, lanyard's etc)
- Bespoke Brochures (Project of design and implementation)
- Interior wall graphics (Large spaces of 17,000 sq. ft plus)
- Glass and display graphics (Including logo and design)

- Displays for international expedition shows such as EBACE, MEBA and NBAA
Overall, GB Visuals have supported us with numerous confirmed commissions and are currently in the process of quoting for a full rebrand of our location, which includes large external signage of an entire facility.

For any further requirements on this organisation, please feel free to contact me directly to discuss.

Sincerely,
